

# CERTIFICATE OF VACCINATION

Date of Rabies Vaccination: 12-28-18  
Next Rabies Vaccination On: 12-28-19

**VETERINARY CLINIC**  
Sorensen Veterinary Hospital  
215 Bolinger Road  
Belgrade, MT 59714  
406-388-6275

**OWNER OF ANIMAL**  
Victoria (Tori) Anderson  
12300 Little Holland Rd  
Manhattan, MT 59741  
County: Gallatin

This is to certify...

THAT I HAVE VACCINATED AGAINST RABIES THE ANIMAL DESCRIBED BELOW.

Patient information...

**PATIENT:** Kitty  
**SPECIES:** Canine  
**Breed:** Poodle, Miniature  
**SEX:** Female  
**Color and markings:** Tri Color

**TAG NO:** 18-12744

**WEIGHT:** 6.80  
**AGE:** 16W  
**Microchip #:**

Signed

## Laboratory Report

<b>Laboratory #:</b>	107261	<b>Call Name:</b>	Kitty-Snickers
<b>Order #:</b>	69459	<b>Registered Name:</b>	-
<b>Ordered By:</b>	Victoria Anderson	<b>Breed:</b>	Miniature Poodle
<b>Ordered:</b>	Nov. 27, 2019	<b>Sex:</b>	Female
<b>Received:</b>	Nov. 29, 2019	<b>DOB:</b>	Sept. 2018
<b>Reported:</b>	Dec. 4, 2019	<b>Registration #:</b>	-

### Results:

Disease	Gene	Genotype	Interpretation
Degenerative Myelopathy	<i>SOD1</i>	WT/WT	Normal (clear)
GM2 Gangliosidosis (Poodle Type)	<i>HEXB</i>	WT/WT	Normal (clear)
Osteochondrodysplasia	<i>SLC13A1</i>	WT/WT	Normal (clear)
Progressive Retinal Atrophy, Progressive Rod-Cone Degeneration	<i>PRCD</i>	WT/WT	Normal (clear)
Von Willebrand Disease I	<i>VWF</i>	WT/WT	Normal (clear)

WT, wild type (normal); M, mutant; Y, Y chromosome (male)

### Interpretation:

Molecular genetic analysis was performed for five specific mutations reported to be associated with disease in dogs. We identified two normal copies of the DNA sequences in the mutations tested.

### Recommendations:

No mutations were identified. Thus, this dog is not at an increased risk for the diseases caused by or associated with the mutations tested. Because this dog is "clear" of these mutations, this dog will only pass the normal genes on to its offspring. Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. Paw Print Genetics® has genetic counseling available to you at no additional charge to answer any questions about these test results, their implications and potential outcomes in breeding this dog.

**Helen F Smith, PhD**  
Assistant Laboratory Director

**Casey R Carl, DVM**  
Associate Medical Director

Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. These tests were developed and their performance determined by Paw Print Genetics®. This laboratory has established and verified the tests' accuracy and precision. Because all tests performed are DNA-based, rare genomic variations may interfere with the performance of some tests producing false results. If you think these results are in error, please contact the laboratory immediately for further evaluation. In the event of a valid dispute of results claim, Paw Print Genetics will do its best to resolve such a claim to the customer's satisfaction. If no resolution is possible after investigation by Paw Print Genetics with the cooperation of the customer, the extent of the customer's sole remedy is a refund of the fee paid. In no event shall Paw Print Genetics be liable for indirect, consequential or incidental damages of any kind. Any claim must be asserted within 60 days of the report of the test results.

## PennHIP Report

Referring Veterinarian: Dr Jessica Kirkpatrick	Clinic Name: Cottonwood Veterinary Hospital MT
Email: cvhbozeman@gmail.com	Clinic Address: 450 N. Cottonwood Rd. Bozeman, MT 59718
	Phone: (406) 582-0555
	Fax: (406) 582-4496

## Patient Information

Client: Anderson, Tori	Tattoo Num:
Patient Name: Macallan	Patient ID: 22071
Reg. Name: 406 Acres LLC Macallan	Registration Num: PD-05325203
PennHIP Num: 154199	Microchip Num:
Species: Canine	Breed: MINIATURE POODLE
Date of Birth: 06 Mar 2020	Age: 10 months
Sex: Male	Weight: 13 lbs/5.9 kgs
Date of Study: 22 Jan 2021	Date Submitted: 17 Mar 2021
Date of Report: 21 Mar 2021	

## Findings

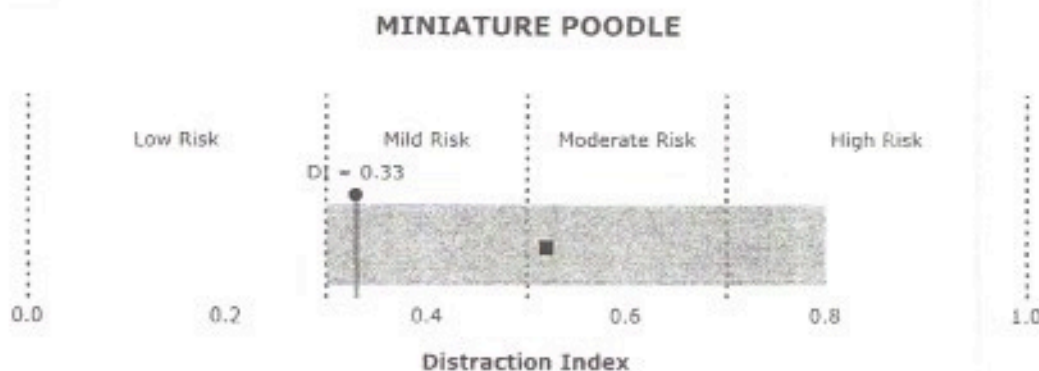

Distraction Index (DI): Right DI = 0.33, Left DI = 0.29.
Osteoarthritis (OA): No radiographic evidence of OA for either hip.
Cavitation/Other Findings: No cavitation present.

## Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.33.

OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.

Distraction Index Chart:

**BREED STATISTICS:** This interpretation is based on a cross-section of 341 canine patients of the MINIATURE POODLE breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.30 - 0.80) for the breed. The breed average DI is 0.52 (solid square). The patient DI is the solid circle (0.33).

**SUMMARY:** The degree of laxity (DI = 0.33) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. No radiographic evidence of OA for either hip.
